

Upcycling Workshop

Duration: 1 Hour

An important aspect of the 3Rs is REUSE. 'Reuse' is about how to lengthen the lifetime of an item or how to avoid an item from reaching the landfill. Upcycling/repurposing is one way of doing that. In this workshop, learn about the importance of upcycling/repurposing items that are considered waste through some fun hands-on activities. Participants will learn to upcycle/repurpose common household items (old T-shirts, empty tin cans, old newspapers, plastic bottles etc.) into something useful and functional.

Workshop Takeaways:

- Perfect for all ages from 5 years and above
- Demonstrates the usefulness of reusing simple items
- A fantastic bonding experience for families as you can all come together to make your day more meaningful and worthwhile!
