- We learn best by doing, it is one of the key components in becoming aware of all that happens around us.
- We curate our learning experiences that enable participants to create, reflect & adopt the practices in their daily life as we also believe that each one of us can bring about change
- Depending on your requirements, our workshops typically last between 1 hour to 2 hours and are based on different themes.
- Check out some of our workshops listed below. We also curate & customize workshops based on your requirements. Reach out to us if you need a customised learning experience.

Introduction to Circular Design

This talk/workshop introduces the principles of Circular Design and Circular Economy. Learn about the problems of the Linear Economy system and how Circular Design & Economy can help towards building a sustainable world and have a go at applying the principles using daily life examples. The duration depends on how much depth the topic needs to be covered as per your requirement; it can be tailored as a talk or as a workshop.

Age group: 10 years and above.

Workshop Takeaways:

- Explain the principles of Circular Design
- State the difference between Linear & Circular design
- State the importance of Circular Design in creating a Sustainable World
- Re-design a day-to-day item using the Circular design principles

Mind your (Ps & Qs) Rs

Duration: 1 - 1.5 hours

Everyone cares about the environment, but we may not be fully aware of the environmental problems around us. Or, if we are, it may be that we are not sure about how to get started to become part of the solution.

Workshop Takeaways:

- This fun game-based workshop focuses on how you can mind your Rs to understand how simple changes in your lifestyle can bring about BIG change
- Walk away with tangible actions & pledges that you will be able to follow-through in your daily life.

Get into the Game of Food Sustainability

Duration: 1 - 1.5 hours

Food Sustainability, Food Waste, Sustainable Food Systems, Food Security - do these terms baffle you? Curious to learn more? We have curated a fun online interactive game that peels the layers around different aspects of food waste/food sustainability, busts some myths around food labels & provides tips on how to create a sustainable food system within our homes.

Workshop Takeaways:

- Perfect for all age groups from 10 years and above
- Great bonding and co-learning experience for families
- Kickstart conversations around the importance of nature, waste mgmt, food waste, food security with children

Get into the Game of Recycling

Duration: 1 Hour

The domestic recycling rate in Singapore is very low, it fell to a low of 13% in 2020. One of the reasons is that there is a lack of awareness about the items that can be recycled and hence thrown into the Blue Bin. We feel that education is the key to improving recycling habits amongst Singapore residents. So, we designed Game-Based learning workshops through which participants would gain knowledge about recycling.

Workshop Takeaways

- Great for all age groups from 5 years and above
- Serves as a platform for beginners to gain a better understanding of how to sort trash based on various characteristics
- Guides participants in learning about the challenges facing the recycling industry with a simple flip of the cards!

Climate Fresk Workshop

Duration: 3 hours

The Climate Fresk Workshop is a science-based workshop that aims to educate and raise awareness about climate change worldwide. Taking from the IPCC report, it explains how and why the climate changes at the current pace and the consequences of its disruption. In this game-based experience, guided by your facilitator, participants work through to find the cause-effect relationship between the different components of climate change. The fun, participatory and collaborative workshop provides an opportunity to learn a lot in a very short period of time.

Workshop Takeaways:

- Suitable for all ages from 10 years and above
- No prior science experience is required! We will all learn together!
- Engage one another in a one-of-a-kind game-based experience
- Put your creative minds to good use with the designing of a vibrant collage

Upcycling Workshop

Duration: 1 Hour

An important aspect of the 3Rs is REUSE. 'Reuse' is about how to lengthen the lifetime of an item or how to avoid an item from reaching the landfill. Upcycling/repurposing is one way of doing that. In this workshop, learn about the importance of upcycling/repurposing items that are considered waste through some fun hands-on activities. Participants will learn to upcycle/repurpose common household items (old T-shirts, empty tin cans, old newspapers, plastic bottles etc.) into something useful and functional.

Workshop Takeaways:

- Perfect for all ages from 5 years and above
- Demonstrates the usefulness of reusing simple items
- A fantastic bonding experience for families as you can all come together to make your day more meaningful and worthwhile!

Eco Enzymes @ Home

Duration: 1 hour

Take one more step towards sustainable living - convert food waste to something useful, reusing plastic bottles, and decrease the chemical load in your house. Say NO to the chemical household cleaners & make your multi-purpose cleaner. Simple & easy - learn how to DIY a multi-purpose cleaner from the food waste generated & resources available at your home. Learn about the many uses & benefits of this DIY cleaner even as a fertiliser/pesticide.

Workshop Takeaways

- Kickstart your journey on DIY cleaners at your home with knowledge about how to make & the DIY Cleaners, and benefits & how to use them
- Experience a hands-on demo on how to do a basic DIY set-up at home with some troubleshooting tips
- The workshop caters to anyone with no scientific knowledge or background to be able to understand & learn about DIY Cleaners & start making them at home
- Perfect for all age groups from 7 years and above
- A wonderful opportunity for families to engage and learn together, and an excellent place to start talks with youngsters about the value of nature, waste management, food waste, and food security

Home Composting

Duration: 1 Hour

Don't bin it – green it! Did you know you can turn “trash” into soil conditioner? Composting @ Home focuses on food wastage in SG and how we can convert our domestic food waste into something useful using practical & interesting methods. Composting is full of amazing benefits, and it can also be a great way to help you in cultivating a sustainable lifestyle.

Workshop Takeaways

- Finally, kickstart your composting at your home! Get knowledge about the process of composting, its benefits, and how to use compost
- Get a hands-on demo on how to do a basic composting set-up at home
- Caters to anyone with no scientific knowledge or background who would be able to understand & learn about composting at home
- Meant for all age groups from 7 years and above
- It serves as a great bonding and co-learning experience for families and is an ideal platform to kickstart conversations around the importance of nature, waste mgmt, food waste, food security with children
